

ITWS-1 PROJECT PROTOTYPE

Project Title: Educardo

Group Name: Divergent

(Varun Chhangani, Kartik Wadhwa, Kashish Sharma, Dilip Jat, Mukul Narain)

The website would be an educational website to let students hoping to have a better hand on Competitive Programming access various reading materials and problems.

Home Page

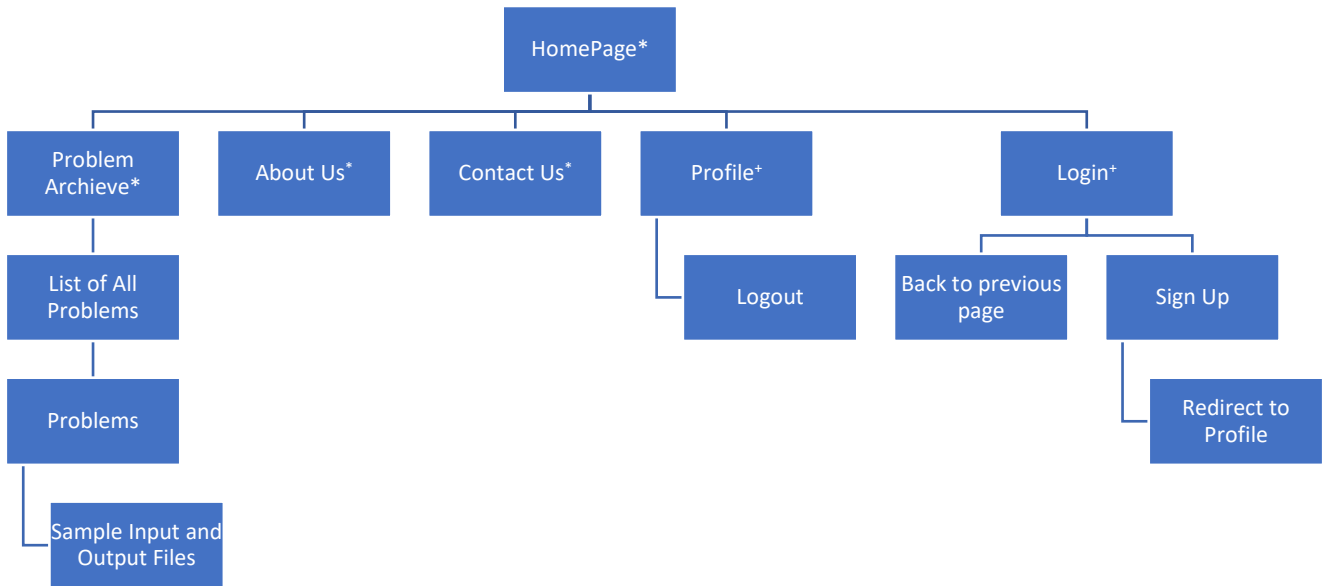

About the Website:

- The website would be collectively using HTML, CSS, JavaScript, PHP and MySQL.
- It would also be using some Google APIs to make the website more dynamic.
- Users would be able to register in the website and could change their profile details and could also visit others profile.
- The profile would also contain the number of problems solved and users would be ranked accordingly.
- Login would have a pop-up and not a distinct page.

- A profile page would display all the data entered at the time of Sign-up.
- The Students can make their own account which would be handled by a Login pop-up and Sign-up Page Controlled by PHP and MySQL.
- The Problems would be accompanied by Sample Input and Output Zip Files.

Workflow of Website

*: The pages could be directly accessible by top navigation bar.

+: The two links can't be available together.

Proposed Layouts
